Elevate the quality and efficiency of radiology reporting

Rapidly deliver accurate, consistent, and actionable reports.

Nuance PowerScribe 360 Reporting is the industry's most trusted and widely used real-time radiology reporting platform. This award-winning solution provides quick, efficient creation of high-quality reports that demonstrate improved clinical and financial outcomes.

With the latest and most accurate speech recognition technology, organizations can optimize performance, reduce turnaround time, improve accuracy, and boost satisfaction.

– Award winning Dragon Medical speech recognition delivers unsurpassed accuracy—more accuracy means less editing.

– A full range of dictation styles are supported to accommodate individual preferences, with unequaled productivity and flexibility.

– Robust template support, a data-centric architecture and tight integrations reduce errors and inconsistencies that impact compliance and reimbursement.

– Access to configurable data capture and extraction tools enables information to be captured when it is needed most.

With PowerScribe 360 Reporting, radiologists and their organizations can achieve measurable efficiencies and improved clinical performance,

positioning themselves as leaders embracing technology and innovation in pursuit of quality.

Smart AutoTexts
Advances in AutoText technology accelerate report creation while ensuring thorough, compliant and accurate content. Relevancy algorithms launch the right template based on report-specific criteria, while AutoTexts embedded within referenced fields facilitate report creation. New organizing tools improve AutoText accessibility and multi-site functionality.

Multimedia reports
Multimedia report capability enhances communication of radiology findings by correlating images with text reports to facilitate better understanding between referrers and patients.

Overread workflow
An improved overread process sends requests for additional report input to the appropriate specialist or section, with full support for resident/attending and attestation workflows in multi-contributor environments.

Assisted diagnosis
Offers integrated knowledge with instant access to disease details, differential diagnoses, e-books, medical image searches, radiology search engines, annotated anatomical atlases and more.

Key benefits

– Streamlined report generation and effective communication of clinical information throughout the enterprise reinforces continuous quality improvement.

– Flexible and personalized reporting options drive rapid turnaround and ensure reports are accurate, consistent, and actionable.

– Structured data facilitates quality measure reporting, participation in registries, and data exchange with EHRs to reduce error-prone and time-consuming manual data entry.

– Development collaboration with leading EHR and RIS/PACS vendors ensures that solutions work within existing infrastructures to maximize IT investments.

– Integrated portfolio of solutions increases the value of your investment and better positions your organization for the future of radiology.

NUANCE

"With PowerScribe 360, the ordering physician has the ability to start treating the patient sooner. More timely reporting means more timely treatments."

Carol Scoggins, System Executive Director
Diagnostic Outreach, WellStar Health Systems

Get even more from your PowerScribe 360 Reporting investment

Maximize your diagnostic work-flow and reporting investment with a portfolio of integrated enhancements.

Diagnostic Workflow and Reporting

PowerScribe 360 Clinical Guidance
Improve follow-up recommendation consistency with evidence-based guidelines.

PowerScribe 360 Quality Check
Check for errors, omissions, oversights, and potential critical findings—automatically.

PowerScribe 360 Peer Review
Address compliance and save time by automating basic peer review processes.

PowerScribe Advanced Data Integration
Auto-import data and map to custom fields to minimize redundant steps and streamline reporting.

PowerScribe Advanced Data Integration with ModLink
Import, manage and normalize measurement, dose, DICOM-SR and other data to improve accuracy.

PowerScribe Mobile Radiologist
Edit, sign and distribute reports and search for radiology content on iOS and Android devices.

PowerScribe Workflow Orchestration
Optimize workload distribution and ensure the right study is read by the right resource at the right time.

PowerScribe Follow-up Manager
Automate identification and proac-tively manage findings and follow-up compliance.

PowerScribe Lung Cancer Screening
Simplify LCS program management, from patient eligibility through follow-up and reporting.

Diagnostic Communication

PowerConnect Actionable Findings (formerly Critical Results)
Communicate actionable findings to ordering clinicians, with automated documentation.

PowerConnect Communicator
Streamline radiology workflow and enhance collaboration with a con-text-aware communication platform.

PowerConnect Mobile Clinician
Receive and reply to actionable findings notifications on iOS and Android devices while on the go.

Radiology Network

PowerShare Image Sharing
Improve report quality and TAT with easy access at the point of care to imaging studies performed offsite.

PowerShare Teleradiology
Expand specialty reach by enabling remote reads (images, orders, reports) from a single native worklist.

Radiology Performance and Analytics

mPower Clinical Analytics
Track and analyze business and clinical performance with data and insights that drive quality improvement.

PowerConnect Peer Campaigns and Peer Learning
Improve the peer review process with tools that enable peer feedback and quality improvement.
